

Revolutionizing the student experience in college and career preparedness.

CCIC Mission

CHERRY CREEK INNOVATION CAMPUS

The Cherry Creek Innovation Campus (CCIC), located near Centennial Airport and the Denver Tech Center, is a state-of-the-art, stand-alone college and career-preparedness facility. At the CCIC, high school students are provided opportunities to gain real-world skills, valuable college credit, and/or industry-recognized certifications. Whether students' immediate post-high school plans include college, military, or entering the workforce, the CCIC offers a new kind of bridge to college and successful careers.

Under the Career and Technical Education umbrella, the CCIC expands the district's commitment to prepare students for the academic and professional demands of the 21st century. The student learning experience mimics modern work environments, with a focus on putting learners in an industry-based culture and climate.

Participating students continue to earn diplomas from their home high schools. Students attend the CCIC every other day during a morning or afternoon session, and transportation is provided to and from each Cherry Creek School District high school.
